Subject index

Accumulation
Nickel; *Pseudomonas;* adsorption; heavy-metals removal; resting cells, 709
Silver resistance; *Thiobacillus ferrooxidans; Thiobacillus thiooxidans,* 331
Acetamidocinnamate amidohydrolase activity
Acetamidocinnamic acid; L-phenylalanine; co-immobilization; κ-carrageenan; aminotransferase activity; *Corynebacterium* sp; *Paracoccus denitrificans,* 479
Acetamidocinnamic acid
L-Phenylalanine; co-immobilization; κ-carrageenan; acetamidocinnamate amidohydrolase activity; aminotransferase activity; *Corynebacterium* sp; *Paracoccus denitrificans,* 479
Acetate kinase
Phosphotransacetylase; immobilization; controlled pore glass; controlled pore silica; storage stability, 285
Acetic acid production
Clostridium spp; mutagenesis; anaerobes; homoacetogens; continuous culture, 117
Acetobacter turbidans
β-Lactam antibiotics; enzyme purification, 339
Acetone-butanol fermentation
Clostridium; solid carriers; continuous culture; cell immobilization, 500
Actinomycetes of Iraqi soils
Glucose isomerase; isomerization, 632
Activity by reducing groups
Aspergillus sp; catabolic repression; reducing groups accumulation; activity by viscosimetry; pectinases, 690
Activity by viscosimetry
Aspergillus sp; catabolic repression; reducing groups accumulation; activity by reducing groups; pectinases, 690
Adsorption
Carriers; *Saccharomyces cerevisiae; Zymomonas mobilis,* 272
Nickel; accumulation; *Pseudomonas;* heavy-metals removal; resting cells, 709
Whole cells; immobilization; entrapment; fermentation; bioreactor, 642
Adsorption model
Pretreatment; lignocellulosic substrates; enzymatic hydrolysis, 79
Adsorption of charged molecules
Ti(IV) coating of silica beads; alkylamine-glutaraldehyde derivatization; L-glutamate 1-carboxy-lyase; immobilization, 225
Affinity
Trypsin; enzyme purification; ultrafiltration, 374
Affinity partitioning
Enzyme purification; triazine dyes; liquid–liquid extraction, 233
Agar
Cellulase; iodine; hydrolysis zone, 214
Agaricus bisporus
α-Glucuronidase; xylanase; β-xylosidase, 83
Laminarinase; *Trichoderma longibrachiatum,* 89
Agitated cultures
Ligninase; *Phanerochaete chrysosporium;* lipase; Tween 80; oleic acid, 245
Air-lift bioreactors
Catharanthus roseus; serpentine; scale-up, 619
Airlift fermenter
Bacillus subtilis; α-amylase; carrageenan; immobilization, 53
Alginate structure
Electron microscopy; immobilized yeast, 102
Alkylamine-glutaraldehyde derivatization
Ti(IV) coating of silica beads; L-glutamate 1-carboxy-lyase; immobilization adsorption of charged molecules, 225
Amino acid replacements
Protein thermostability, genetic engineering; protein secondary structure; hydropathic profile, 238
γ-[^{13}N]Aminobutyric acid
Glutamate decarboxylase; immobilization; enzyme column, 221
Ammonium regulation
Tylosin biosynthesis; *Streptomyces fradiae;* tylonolide precursor-forming enzymes; macrocin-*o*-methyl transferase, 590
Amylase
Raw starch; thermostable β-amylase; *Clostridium thermosulfurogenes,* 598

Bacillus genetic engineering; enzyme production, 546
Bacillus subtilis; carrageenan; airlift fermenter; immobilization, 53
Cellulase production; extracellular fungal enzymes, 308
Lactobacillus cellobiosus; immobilized systems, 112
Tannin; *Calvatia gigantea*, 94
Amyloglucosidase
Lactic acid; hydrolysed starchy substrates; ragi flour; wheat bran; soluble starch; *Lactobacillus plantarum;* crude enzymes of *Aspergillus ustus*; bacterial α-amylase, 726
Anaerobes
Clostridium spp; mutagenesis; acetic acid production; homoacetogens; continuous culture, 117
Androst-4-ene-3,17-dione
Steroid transformation; side-chain degradation; cholesterol; androsta-1,4-diene-3,17-dione; *Mycobacterium* sp; magnetic immobilization; magnetic adsorption, 494
Androsta-1,4-diene-3,17-dione
Steroid transformation; side-chain degradation; cholesterol; androst-4-ene-3,17-dione; *Mycobacterium* sp; magnetic immobilization; magnetic adsorption, 494
Animal cells
Bioreactor; production techniques; mammalian proteins; dense cultures, 514
Anticoagulant
Myxococcus xanthus; glycopeptide, 426
Appropriate technology
Vinegar; microbial film reactor, 369
Aqueous two-phase systems
β-Galactosidase fused protein A; purification; extraction, 730
Ash
Fungal enzymes; solid state fermentation; cellulase; β-D-glucosidase; D-xylanase; rice straw; wheat bran; fibre; lignin; crude protein, 97
Asymmetrical coupling
Immobilized enzymes; bienzyme membrane; sequential enzymes; product partition; diffusion cell; compartmentalization, 652
Aspen
Steam explosion; wheat straw; enzymic saccharification; enzyme recovery, 714
Aspergillus niger
Citric acid; brewery wastes; trace metals; stimulants, 291
Aspergillus ochraceus
Steroid transformation; solvent damage, 365
Aspergillus phoenicis
Cellulase; *Trichoderma reesei*, 47
Aspergillus sp.
Catabolic repression; reducing groups accumulation; activity by reducing groups; activity by viscosimetry; pectinases, 690
Aspergillus ustus
Cellulose; cellulase, EC3.2.1.4; saccharification; *Trichoderma viride*, 484
Autolysis of trypsin
Trypsin; crosslinking agents; bisimidoester; glutaraldehyde, 161
Azotobacter vinelandii
Cell lysis; dehydrogenases; enzyme recovery, 470

Bacillus genetic engineering
α-Amylase; enzyme production, 546
Bacillus megaterium
Endo-β-1,4-glucanase gene; cloning; overproduction; secretion; plasmid stability; *Bacillus subtilis*, 594
Bacillus sp. PDV
Cloning; endoglucanase expression; cmcase gene, 602
Bacillus sphaericus
L-Cysteine production; *O*-acetylserine sulphydrylase, 277
Bacillus stearothermophilus
Thermostable amylase; purification, 749
Bacillus subtilis
α-Amylase; carrageenan; airlift fermenter; immobilization, 53
Endo-β-1,4-glucanase gene; cloning; overproduction; secretion; plasmid stability; *Bacillus megaterium*, 594
Immobilized systems; menthyl acetate, 217
Bacterial α-amylase
Lactic acid; hydrolysed starchy substrates; ragi flour; wheat bran; soluble starch; *Lactobacillus plantarum;* crude enzymes of *Aspergillus ustus;* amyloglucosidase, 726
Batch culture
Calorimetry; *Kluyveromyces fragilis;* energy balance; carbon balance; heat yield; whey permeate, 33
Bead cellulose
Size-exclusion effects of substrate; porous biocatalyst; immobilized trypsin; hydrodynamic diameter of substrate; structure-activity relations, 44
Benzonitrile
Catechol-2,3-oxygenase; halocatechol; fluorcatechol; fluorobenzene; *Pseudomonas*, 706
Bienzyme membrane
Immobilized enzymes; asymmetrical coupling; sequential enzymes; product partition; diffusion cell; compartmentalization, 652
Biocatalyst screening
Commercial applications; technological potential, 194
Biocatalysts
Ketone reductions; *Curvularia lunata; Penicillium frequentans;* kinetic studies; oxidoreductases, 521
Biological control
Protoplast fusion; *Metarhizium anisopliae*, 149
Biomass
Dielectric spectroscopy; biosensors, 181
Biomedical products
Immobilized cells; bioreactor systems; process applications; fermentation products; wastewater treatment, 66
Bioreactor
Animal cells; production techniques; mammalian proteins; dense cultures, 514
Ethanol fermentation; whole cell immobilization; high ethanol productivity; continuous dynamic immobilized cell fermenter, 406
Whole cells; immobilization; adsorption; entrapment; fermentation, 624
Bioreactor design
Regime analysis; rules of thumb; scale-up, 386
Bioreactor systems
Immobilized cells; process applications; fermentation products; biomedical products; wastewater treatment, 66
Bioreactors
Coffea arabica; purine alkaloids; caffeine, 450
Biosensors
Biomass; dielectric spectroscopy, 181
Biphasic one-pot synthesis
Enzymatic NAD(P)H regeneration, 564
Bisimidoester
Trypsin; crosslinking agents; glutaraldehyde; autolysis of trypsin, 161
Bonechar
Solvent production; whey permeate; cell immobilization, 668
Brewery wastes
Citric acid; *Aspergillus niger;* trace metals; stimulants, 291

Caffeine
Coffea arabica; purine alkaloids; bioreactors, 450
Calorimetry
Kluyveromyces fragilis; energy balance; carbon balance; heat yield; batch culture; whey permeate, 33
Calcium alginate immobilization
Hepatic microsomes; oxidation; *N*-oxidation; oxygenation; hepatic assist; NADPH; chlorpromazine; detoxification, 685
Calvatia gigantea
Tannin; α-amylase, 94
Candida parapsilosis
Stereoselective reaction; D(-)-pantoyl lactone; *Nocardia asteroides*, 411
Candida utilis
Saccharomycopsis fibuliger; food wastes; Symba process, 430, 434
Carbamoylase
L-Tryptophan; DL-5-indolylmethylhydantoin; *N*-carbamoyl-L-tryptophan; hydantoinase; flavobacterium, 721
Carbon balance
Calorimetry; *Kluyveromyces fragilis;* energy balance; heat yield; batch culture; whey permeate, 33
Carrageenan
Bacillus subtilis; α-amylase; airlift fermenter; immobilization, 53
κ-Carrageenan
Acetamidocinnamic acid; L-phenylalanine; co-immobilization; acetamidocinnamate amidohydrolase activity; aminotransferase activity; *Corynebacterium* sp; *Paracoccus denitrificans*, 479
Tagetes minuta; immobilized systems; environmental conditions, 303
Carriers
Adsorption; *Saccharomyces cerevisiae; Zymomonas mobilis*, 272
Casein micelles
Cheese making; milk coagulation, 578
Catabolic repression
Aspergillus sp; reducing groups accumulation; activity by reducing groups; activity by viscosimetry; pectinases, 690
Catechol-2,3-oxygenase
Halocatechol; fluorcatechol; benzonitrile; fluorobenzene; *Pseudomonas*, 706
Catharanthine
Catharanthus roseus; medium optimization; secondary metabolite production, 466
Catharanthus roseus
catharanthine; medium optimization; secondary metabolite production, 466
Catharanthus roseus
Serpentine; scale-up; air-lift bioreactors, 619
Cell culture
HeLa cells; growth factor, 295
Cell culture
Hybridoma; growth inhibition, 607

Cell immobilization
Solvent production; whey permeate; bonechar, 668
Cell lysis
Dehydrogenases; *Azotobacter vinelandii;* enzyme recovery, 470
Cell recycle
Flow cytometry; *Saccharomyces cerevisiae,* 399
Cellobiohydrolase
Cellulase; *Trichoderma reesei;* turbidimetry; purification; endoglucanase; specificity. zymogram, 25
Cellulase, EC 3.2.1.4
Cellulose; saccharification; *Aspergillus ustus; Trichoderma viride,* 484
Cellulase
Agar; iodine; hydrolysis zone, 214
Endoglucanase; EC 3.2.1.4; β-glucosidase; EC 3.2.1.21; *Robillarda;* synergism, 459
Fungal enzymes; solid state fermentation; β-D-glucosidase; D-xylanase; rice straw; wheat bran; fibre; lignin; ash; crude protein, 97
Glucose; immobilization; nitrogen; production medium; *Trichoderma reesei,* 739
Hemicellulose hydrolysis; thermophilic fungi; *Thermoascus aurantiacus;* xylanase; thermostability, 16
Penicillium pinophilum; β-glucosidase; mutants; strain improvement, 169
Penicillium pinophilum; β-glucosidase; mutant strains, 355
Penicillium pinophilum; xylanase; β-glucosidase; mutants; enzyme production, 176
Trichoderma reesei; Aspergillus phoenicis, 47
Trichoderma reesei; turbidimetry; purification; endoglucanase; cellobiohydrolase; specificity; zymogram, 25
Cellulase production
α-Amylase; extracellular fungal enzymes, 308
Cellulose
Cellulase; saccharification; *Aspergillus ustus; Trichoderma viride,* 484
Cheese making
Casein micelles; milk coagulation, 578
Chloroplast membranes
Immobilization; photobleaching; photoinhibition; photoacoustic spectroscopy; electron transfer, 489
Chlorpromazine
Hepatic microsomes; oxidation; *N*-oxidation; oxygenation; calcium alginate immobilization; hepatic assist; NADPH; detoxification, 685
Cholesterol
Steroid transformation; side-chain degradation; androst-4-ene-3,17-dione; androsta-1,4-diene-3,17-dione; *Mycobacterium* sp; magnetic immobilization; magnetic adsorption, 494
Cholinesterase
Operational stability; electrochemical method, 74
Citric acid
Brewery wastes; *Aspergillus niger;* trace metals; stimulants, 291
Citrobacter sp.
Immobilized biofilm; uranium accumulation; lead accumulation; phosphatase, 2
Cloning
Clostridium thermocellum; β-glucosidase; *Escherichia coli;* DNA, 474
Endoglucanase expression; *Bacillus* sp. PDV; cmcase gene, 602
Endo-β-1,4-glucanase gene; overproduction; secretion; plasmid stability; *Bacillus subtilis; Bacillus megaterium,* 594
Clostridium
Acetone-butanol fermentation; solid carriers; continuous culture; cell immobilization, 500
Clostridium acetobutylicum
Continuous solvent production; in-line product removal; whey permeate, 672
Clostridium spp.
Mutagenesis; anaerobes; acetic acid production; homoacetogens; continuous culture, 117
Clostridium thermocellum
β-Glucosidase; *Escherichia coli;* cloning; DNA, 474
Clostridium thermosulfurogenes
Raw starch; thermostable β-amylase; amylase, 598
Cmcase gene
Cloning; endoglucanase expression; *Bacillus* sp. PDV, 602
Co-immobilization
Acetamidocinnamic acid; L-phenylalanine; κ-carrageenan; acetamidocinnamate amidohydrolase activity; aminotransferase activity; *Corynebacterium* sp.; *Paracoccus denitrificans,* 479
Coffea arabica
Purine alkaloids; caffeine; bioreactors, 450
Commercial applications
Biocatalyst screening; technological potential, 194
Compartmentalization
Immobilized enzymes; bienzyme membrane; asymmetrical coupling; sequential enzymes; product partition; diffusion cell, 652
Continuous bioreactor
2,3-Butanediol production; *Klebsiella pneumoniae;* oxygen transfer rate, 107
Continuous culture
Clostridium spp.; mutagenesis; anaerobes; acetic acid production; homoacetogens, 117
Continuous dynamic immobilized cell fermenter
Ethanol fermentation; whole cell immobilization; bioreactor; high ethanol productivity, 406
Continuous reactor
Serratia marcescens; metabolite release; nutrient limitation, 153
Continuous solvent production
Clostridium acetobutylicum; in-line product removal; whey permeate, 672
Continuous substrate utilization
Ethanol; fermentation, 559
Controlled pore glass
Acetate kinase; phosphotransacetylase; immobilization; controlled pore silica; storage stability, 285
Controlled pore silica
Acetate kinase; phosphotransacetylase; immobilization; controlled pore glass; storage stability, 285
Copper ions
Phenylalanine; precipitation; phenylpyruvic acid; hydrogen sulphide, 542
Corynebacterium sp.
Acetamidocinnamic acid; L-phenylalanine; co-immobilization; κ-carrageenan; acetamidocinnamate amidohydrolase activity; aminotransferase activity; *Paracoccus denitrificans,* 479
Covalent immobilization of cells
Viable immobilized cells; transformation of steroids, 538
Crosslinking agents
Trypsin; bisimidoester; glutaraldehyde; autolysis of trypsin, 161
Crude enzymes of *Aspergillus ustus*
Lactic acid; hydrolysed starchy substrates; ragi flour; wheat bran; soluble starch; *Lactobacillus plantarum;* bacterial α-amylase; amyloglucosidase, 726
Crude protein
Fungal enzymes; solid state fermentation; cellulase; β-D-glucosidase; D-xylanase; rice straw; wheat bran; fibre; lignin; ash, 97
Curvularia lunata
Ketone reductions; *Penicillium frequentans;* kinetic studies; biocatalysts; oxidoreductases, 521
L-Cysteine production
Bacillus sphaericus; O-acetylserine sulphydrylase, 277

Dehydrogenases
Cell lysis; *Azotobacter vinelandii;* enzyme recovery, 470
Dense cultures
Animal cells; bioreactor; production techniques; mammalian proteins, 514
Detoxification
Hepatic microsomes; oxidation; *N*-oxidation; oxygenation; calcium alginate immobilization; hepatic assist; NADPH; chlorpromazine, 685
Dielectric spectroscopy
Biomass; biosensors, 181
Diffusion cell
Immobilized enzymes; bienzyme membrane; asymmetrical coupling; sequential enzymes; product partition; compartmentalization, 652
Dinitrogenase reductase
Klebsiella pneumoniae; Saccharomyces cerevisiae; gene expression, 438
DNA
Clostridium thermocellum; β-glucosidase; *Escherichia coli;* cloning, 474
Dynamic behavior
Fermentation; ethanol; steady-state; high cell density, 676

Electrochemical method
Cholinesterase; immobilization; operational stability, 74
Electron microscopy
Alginate structure; immobilized yeast, 102
Electron transfer
Immobilization; chloroplast membranes; photobleaching; photoinhibition; photoacoustic spectroscopy, 489
Emulsion
Transphosphatidylation; phospholipase D; phosphatidylcholine (lectin); phosphatidylglycerol; micelle system, 350
Endo-β-1,4-glucanase gene
Cloning; overproduction; secretion; plasmid stability; *Bacillus subtilis; Bacillus megaterium,* 594
Endoglucanase
Cellulase; EC 3.2.1.4; β-glucosidase; EC 3.2.1.21; *Robillarda;* synergism, 459
Cellulase; *Trichoderma reesei;* turbidimetry; purification; cellobiohydrolase; specificity; zymogram, 25
Talaromyces emersonii; mutants; β-glucosidase, 422
Endoglucanase expression
Cloning; *Bacillus* sp. PDV; cmcase gene, 602
Energy balance
Calorimetry; *Kluyveromyces fragilis;*

carbon balance; heat yield; batch culture; whey permeate, 33
Entrapment
Whole cells; immobilization; adsorption; fermentation; bioreactor, 624
Environmental conditions
Tagetes minuta; immobilized systems; κ-carrageenan, 303
Enzymatic hydrolysis
Pretreatment; lignocellulosic substrates; adsorption model, 79
Enzymatic method
D-Xylose isomerase; D-sorbitol dehydrogenase; *Streptomyces violaceoruber,* 145
Enzymatic NAD(P)H regeneration
Biphasic one-pot synthesis, 564
Enzymatic synthesis
N-labelled aminoacids; immobilized enzymes; protein incorporation, 663
Enzyme bioconversion
Enzyme emulsions; liquid membrane reactors; L-leucine; enzyme/co-enzyme systems, 625
Enzyme column
Glutamate decarboxylase; immobilization; γ-[^{13}N]aminobutyric acid, 221
Enzyme emulsions
Enzyme bioconversion; liquid membrane reactors; L-leucine; enzyme/co-enzyme systems, 625
Enzyme production
Bacillus genetic engineering; α-amylase, 546
Penicillium pinophilum; cellulase; xylanase; β-glucosidase; mutants, 176
Enzyme purification
Acetobacter turbidans; β-lactam antibiotics, 339
Triazine dyes; liquid-liquid extraction; affinity partitioning, 233
Trypsin; ultrafiltration; affinity, 374
Enzyme recovery
Cell lysis; dehydrogenases; *Azotobacter vinelandii,* 470
Steam explosion; aspen; wheat straw; enzymic saccharification, 714
Yeast, 281
Enzyme/co-enzyme systems
Enzyme bioconversion; enzyme emulsions; liquid membrane reactors; L-leucine, 625
Enzymic saccharification
Steam explosion; aspen; wheat straw; enzyme recovery, 714
Escherichia coli
Clostridium thermocellum; β-glucosidase; cloning; DNA, 474
β-Galactosidase fused protein A; purification; extraction; aqueous two-phase systems, 730
Ethanol
Fermentation; continuous substrate utilization, 559
Fermentation; steady-state; dynamic behavior; high cell density, 676
Saccharomyces cerevisiae; growth inhibition; water activity, 334
Ethanol fermentation
Whole cell immobilization; bioreactor; high ethanol productivity; continuous dynamic immobilized cell fermenter, 406
Ethanol tolerance
Toxicity; osmotic pressure; intracellular accumulation; yeast, 322
Expression systems
Heat shock (hs) genes; promoter function, 130
Extracellular fungal enzymes
Cellulase production; α-amylase, 308
Extraction
β-Galactosidase fused protein A; *Escherichia coli;* purification; aqueous two-phase systems, 730

Fermentation
Ethanol; continuous substrate utilization, 559
Ethanol; steady-state; dynamic behavior; high cell density, 676
Whole cells; immobilization; adsorption; entrapment; bioreactor, 624
Fermentation products
Immobilized cells; bioreactor systems; process applications; biomedical products; wastewater treatment, 66
Fibre
Fungal enzymes; solid state fermentation; cellulase; β-D-glucosidase; D-xylanase; rice straw; wheat bran; lignin; ash; crude protein, 97
Filamentous microbes
Sludges; stable foam, 164
Flavobacterium
L-Tryptophan; DL-5-indolylmethylhydantoin; *N*-carbamoyl-L-tryptophan; hydantoinase; carbamoylase, 721
Flow cytometry
Saccharomyces cerevisiae; cell recycle, 399
Fluorcatechol
Catechol-2,3-oxygenase; halocatechol; benzonitrile; fluorobenzene; *Pseudomonas,* 706
Fluorobenzene
Catechol-2,3-oxygenase; halocatechol; fluorcatechol; benzonitrile; *Pseudomonas,* 706
Food wastes
Saccharomycopsis fibuliger; Candida utilis; Symba process, 434
Freeze-drying
Survival kinetics; storage; interfacial area, 531
Fungal enzymes
Solid state fermentation; cellulase; β-D-glucosidase; D-xylanase; rice straw; wheat bran; fibre; lignin; ash; crude protein, 97

β-Galactosidase
Kluyveromyces bulgaricus; permeabilization, 300
β-Galactosidase fused protein A
Escherichia coli; purification; extraction; aqueous two-phase systems, 730
Gel chromatography
Isoelectric precipitation; monoclonal antibodies; pilot scale purification, 361
Gene expression
Klebsiella pneumoniae; Saccharomyces cerevisiae; dinitrogenase reductase, 438
Genetic engineering
Protein thermostability; protein secondary structure; hydropathic profile; amino acid replacements, 238
Glucose
Cellulase; immobilization; nitrogen; production medium; *Trichoderma reesei,* 739
Glucose isomerase
Isomerization; actinomycetes of Iraqi soils, 632
β-Glucosidase
Cellulase; endoglucanase; EC 3.2.1.4; EC 3.2.1.21; *Robillarda;* synergism, 459
Clostridium thermocellum; Escherichia coli; cloning; DNA, 474
Penicillium pinophilum; cellulase; mutants; strain improvement, 169
Penicillium pinophilum; cellulase; mutant strains, 355
Penicillium pinophilum; cellulase; xylanase; mutants; enzyme production, 176
Talaromyces emersonii; mutants; endoglucanase, 422
β-Glucosidase production
thermophilic fungi; *Sporotrichum thermophile;* thermostability, 744
β-D-Glucosidase
Fungal enzymes; solid-state fermentation; cellulase; D-xylanase; rice straw; wheat bran; fibre; lignin; ash; crude protein, 97
α-Glucuronidase
Agaricus bisporus; xylanase; β-xylosidase, 83
L-Glutamate 1-carboxy-lyase
Ti(IV) coating of silica beads; alkylamine-glutaraldehyde derivation; immobilization; adsorption of charged molecules, 225
Glutamate decarboxylase
Immobilization; enzyme column; γ-[^{13}N]aminobutyric acid, 221
Glutaraldehyde
Trypsin; crosslinking agents; bisimidoester; autolysis of trypsin, 161
Glycopeptide
Myxococcus xanthus; anticoagulant, 426
Growth factor
HeLa cells; cell culture, 295
Growth inhibition
Hybridoma; cell culture, 607
Saccharomyces cerevisiae; ethanol; water activity, 334

Halocatechol
Catechol-2,3-oxygenase; fluorcatechol; benzonitrile; fluorobenzene; *Pseudomonas,* 706
Heat shock (hs) genes
Promoter function; expression systems, 130
Heat yield
Calorimetry; *Kluyveromyces fragilis;* energy balance; carbon balance; batch culture; whey permeate, 33
Heavy-metals removal
Nickel; accumulation; *Pseudomonas;* adsorption; resting cells, 709
HeLa cells
Growth factor; cell culture, 295
Hemicellulose degradation
Penicillium funiculosum; starch damage; starch granule model; milling, 156
Hemicellulose hydrolysis
Thermophilic fungi; *Thermoascus aurantiacus;* xylanase; cellulase; thermostability, 16
Hepatic microsomes
Oxidation; *N*-oxidation; oxygenation; calcium alginate immobilization; hepatic assist; NADPH; chlorpromazine; detoxification, 685
Hepatic assist
Hepatic microsomes; oxidation; *N*-oxidation; oxygenation; calcium alginate immobilization; NADPH; chlorpromazine; detoxification, 685
High cell density
Fermentation; ethanol; steady-state; dynamic behavior, 676
High ethanol productivity
Ethanol fermentation; whole cell immobilization; bioreactor; continuous dynamic immobilized cell fermenter, 406
HN protein
Sendai virus; neuraminidase, 553

Hollow fibre reactor
Nocardia mediterranei; rifamycin B, 345
Homoacetogens
Clostridium spp; mutagenesis; anaerobes; acetic acid production; continuous culture, 117
Hybridoma
Cell culture; growth inhibition, 607
Hydantoinase
L-Tryptophan; DL-5-indolylmethylhydantoin; n-carbamoyl-l-tryptophan; carbamoylase; flavobacterium, 721
Hydrodynamic diameter of substrate
Size-exclusion effects of substrate; porous biocatalyst; immobilized trypsin; bead cellulose; structure-activity relations, 44
Hydrogen sulphide
Phenylalanine; precipitation; copper ions; phenylpyruvic acid, 542
Hydrolysis zone
Cellulase; agar; iodine, 214
Hydrolysed starchy substrates
Lactic acid; ragi flour; wheat bran; soluble starch; *Lactobacillus plantarum;* crude enzymes of *Aspergillus ustus;* bacterial α-amylase; amyloglucosidase, 726
Hydropathic profile
Protein thermostability; genetic engineering; protein secondary structure; amino acid replacements, 238

Immobilization
Acetate kinase; phosphotransacetylase; controlled pore glass; controlled pore silica; storage stability, 285
β-Amylase EC 3.2.1.2; polystyrene cation exchange resin; *Ipomea batata,* 550
Bacillus subtilis; α-amylase; carrageenan; airlift fermenter, 53
Cellulase; glucose; nitrogen; production medium; *Trichoderma reesei,* 739
Chloroplast membranes, photobleaching; photoinhibition; photoacoustic spectroscopy; electron transfer, 489
Cholinesterase; operational stability; electrochemical method, 74
Glutamate decarboxylase; enzyme column; γ-[^{13}N]aminobutyric acid, 221
Ti(IV) coating of silica beads; alkylamine-glutaraldehyde derivatization; L-glutamate 1-carboxy-lyase; adsorption of charged molecules, 225
Whole cells; adsorption; entrapment; fermentation; bioreactor, 642
Immobilized biofilm
Citrobacter sp; uranium accumulation; lead accumulation; phosphatase, 2
Immobilized cell systems
N.m.r. spectroscopy; microbial, mammalian and plant cell metabolism; *in vivo* enzyme reaction rates, 259
Immobilized cells
Bioreactor systems; process applications; fermentation products; biomedical products; wastewater treatment, 666
Packed-bed bioreactor; organic solvent; propene oxide production; production inhibition; kinetic modeling, 612
Immobilized enzymes
Bienzyme membrane; asymmetrical coupling; sequential enzymes; product partition; diffusion cell; compartmentalization, 652
N-labelled amino acids; enzymatic synthesis; protein incorporation, 663
Immobilized systems
α-Amylase; *Lactobacillus cellobiosus,* 112
Bacillus subtilis; menthyl acetate, 217
Tagetes minuta; environmental conditions; κ-carrageenan, 303
Immobilized trypsin
Size-exclusion effects of substrate; porous biocatalyst; bead cellulose; hydrodynamic diameter of substrate; structure-activity relations, 44
Immobilized yeast
Electron microscopy; alginate structure, 102
In vivo enzyme reaction rates
N.m.r. spectroscopy; microbial, mammalian and plant cell metabolism; immobilized cell systems, 259
In-line product removal
Clostridium acetobutylicum; continuous solvent production; whey permeate, 672
DL-5-Indolylmethylhydantoin
L-Tryptophan; n-carbamoyl-l-tryptophan; hydantoinase; carbamoylase; flavobacterium, 721
Interfacial area
Survival kinetics; freeze-drying; storage, 531
Intracellular accumulation
Ethanol tolerance; toxicity; osmotic pressure; yeast, 322
Iodine
Cellulase; agar; hydrolysis zone, 214
Ipomea batata
β-Amylase EC 3.2.1.2; immobilization; polystyrene cation exchange resin, 550
Isoelectric precipitation
Monoclonal antibodies; pilot scale purification; gel chromatography, 361
Isomerization
Glucose isomerase; actinomycetes of Iraqi soils, 632

Ketone reductions
Curvularia lunata; Penicillium frequentans; kinetic studies; biocatalysts; oxidoreductases, 521
Kinetic modeling
Immobilized cells; packed-bed bioreactor; organic solvent; propene oxide production; production inhibition, 612
Kinetic studies
Ketone reductions; *Curvularia lunata; Penicillium frequentans;* biocatalysts; oxidoreductases, 521
Klebsiella pneumoniae
2,3-Butanediol production; continuous bioreactor; oxygen transfer rate, 107
Saccharomyces cerevisiae; gene expression; dinitrogenase reductase, 438
Kluyveromyces bulgaricus
β-Galactosidase; permeabilization, 300
Kluyveromyces fragilis
Calorimetry; energy balance; carbon balance; heat yield; batch culture; whey permeate, 33

β-Lactam antibiotics
Acetobacter turbidans; enzyme purification, 339
Lactic acid
Hydrolysed starchy substrates; ragi flour; wheat bran; soluble starch; *Lactobacillus plantarum;* crude enzymes of *Aspergillus ustus;* bacterial α-amylase; amyloglucosidase, 726
Lactobacillus cellobiosus
α-Amylase; immobilized systems, 112
Lactobacillus plantarum
Lactic acid; hydrolysed starchy substrates; ragi flour; wheat bran; soluble starch; crude enzymes of *Aspergillus ustus;* bacterial α-amylase; amyloglucosidase, 726
Laminarinase
Trichoderma longibrachiatum; Agaricus bisporus, 89
Lead accumulation
Immobilized biofilm; *Citrobacter* sp; uranium accumulation; phosphatase, 2
L-Leucine
Enzyme bioconversion; enzyme emulsions; liquid membrane reactors; enzyme/co-enzyme systems, 625
Lignin
Fungal enzymes; solid state fermentation; cellulase; β-D-glucosidase; D-xylanase; rice straw; wheat bran; fibre; ash; crude protein, 97
Lignin related-compounds
Streptomyces; lignocellulose, 526
Ligninase
Phanerochaete chrysosporium; lipase; Tween 80; oleic acid; agitated cultures, 245
Lignocellulose
Streptomvces; lignin-related-compounds, 526
Lignocellulosic substrates
Pretreatment; enzymatic hydrolysis; adsorption model, 79
Lipase
Ligninase; *Phanerochaete chrysosporium;* Tween 80; oleic acid; agitated cultures, 245
Liquid membrane reactors
Enzyme bioconversion; enzyme emulsions; L-leucine; enzyme/co-enzyme systems, 625
Liquid-liquid extraction
Enzyme purification; triazine dyes; affinity partitioning, 233

Macrocin-*O*-methyltransferase
Tylosin biosynthesis; *Streptomyces fradiae;* ammonium regulation; tylonolide precursor-forming enzymes, 590
Magnetic adsorption
Steroid transformation; side-chain degradation; cholesterol; androst-4-ene-3,17-dione; androsta-1,4-diene-3,17-dione; *Mycobacterium* sp; magnetic immobilization, 494
Magnetic immobilization
Steroid transformation; side-chain degradation; cholesterol; androst-4-ene-3,17-dione; androsta-1,4-diene-3,17-dione; *Mycobacterium* sp; magnetic adsorption, 494
Mammalian and plant cell metabolism
N.m.r. spectroscopy; microbial cell metabolism; immobilized cell systems; *in vivo* enzyme reaction rates, 259
Mammalian proteins
Animal cells; bioreactor; production techniques; dense cultures, 514
Medium optimization
Catharanthus roseus; catharanthine; secondary metabolite production, 466
Menthyl acetate
Bacillus subtilis; immobilized systems, 217
Metabolite release
Serratia marcescens; continuous reactor; nutrient limitation, 153
Metarhizium anisopliae
Protoplast fusion; biological control, 149
Micelle system
Transphosphatidylation; phospholipase D; phosphatidylcholine (lectin); phosphatidylglycerol; emulsion, 350
Microbial cell metabolism
N.m.r. spectroscopy; mammalian and plant cell metabolism; immobilized cell

systems; *in vivo* enzyme reaction rates, 259
Microbial film reactor
Vinegar; appropriate technology, 369
Milk coagulation
Casein micelles; cheese making, 578
Milling
Penicillium funiculosum; hemicellulose degradation; starch damage; starch granule model, 156
Monoclonal antibodies
Isoelectric precipitation; pilot scale purification; gel chromatography, 361
Mutagenesis
Clostridium spp; anaerobes; acetic acid production; homoacetogens; continuous culture, 117
Mutant strains
Penicillium pinophilum; cellulase; β-glucosidase, 355
Mutants
Penicillium pinophilum; cellulase; β-glucosidase; strain improvement, 169
Penicillium pinophilum; cellulase; xylanase; β-glucosidase; enzyme production, 176
Talaromyces emersonii; endoglucanase; β-glucosidase, 422
Mycobacterium sp.
Steroid transformation; side-chain degradation; cholesterol; androst-4-ene-3,17-dione; androsta-1,4-diene-3,17-dione; magnetic immobilization; magnetic adsorption, 494
Myxococcus xanthus
Glycopeptide; anticoagulant, 426

N-carbamoyl-l-tryptophan
l-Tryptophan; DL-5-indolylmethylhydantoin; hydantoinase; carbamoylase; flavobacterium, 721
N-labeled aminoacids
Enzymatic synthesis; immobilized enzymes; protein incorporation, 663
N-oxidation
Hepathic microsomes; oxidation; oxygenation; calsium alginate immobilization; hepatic assist; nadph; chlorpromazine; detoxification, 685
N.m.r. spectroscopy
Microbial, mammalian and plant cell metabolism; immobilized cell systems; *in vivo* enzyme reaction rates, 259
NADPH
Hepatic microsomes; oxidation; *N*-oxidation; oxygenation; calcium alginate immobilization; hepatic assist; chlorpromazine; detoxification, 685
Neuraminidase
Sendai virus; HN protein, 553
Nickel
Accumulation; *Pseudomonas;* adsorption; heavy-metals removal; resting cells, 709
Nitrogen
Cellulase; glucose; immobilization; production medium; *Trichoderma reesei*, 739
Nocardia asteroides
Stereoselective reaction; D(-)-pantoyl lactone; *Candida parapsilosis*, 411
Nocardia mediterranei
Rifamycin B; hollow fibre reactor, 345
Nutrient limitation
Serratia marcescens; metabolite release; continuous reactor, 153

O-acetylserine sulphydrylase
L-Cysteine production; *Bacillus sphaericus*, 277
Oleic acid
Ligninase; *Phanerochaete chrysosporium;* lipase; Tween 80; agitated cultures, 245
Operational stability
Cholinesterase; immobilization; electrochemical method, 74
Optimization
L-Phenylalanine production; yeast cells, 417
Organic solvent
Immobilized cells; packed-bed bioreactor; propene oxide production; production inhibition; kinetic modeling, 612
Osmotic pressure
Ethanol tolerance; toxicity; intracellular accumulation; yeast, 322
Overproduction
Endo-β-1,4-glucanase gene; cloning; secretion; plasmid stability; *Bacillus subtilis; Bacillus megaterium*, 594
Oxidation
Hepatic microsomes; *N*-oxidation; oxygenation; calcium alginate immobilization; hepatic assist; NADPH; chlorpromazine; detoxification, 685
Oxidoreductases
Ketone reductions; *Curvularia lunata; Penicillium frequentans;* kinetic studies; biocatalysts, 521
Oxygen transfer rate
2,3-Butanediol production; *Klebsiella pneumoniae;* continuous bioreactor, 107
Oxygenation
Hepatic microsomes; oxidation; *N*-oxidation; calcium alginate immobilization; hepatic assist; NADPH; chlorpromazine; detoxification, 685

Pachysolen tannophilus
Xylose fermentation; process optimization, 5
Packed-bed bioreactor
Immobilized cells; organic solvent; propene oxide production; production inhibition; kinetic modeling, 612
D(-)-Pantoyl lactone
Stereo selective reaction; *Nocardia asteroides; Candida parapsilosis*, 411
Paracoccus denitrificans
Acetamidocinnamic acid; L-phenylalanine; co-immobilization; κ-carrageenan; acetamidocinnamate amidohydrolase activity; aminotransferase activity; *Corynebacterium* sp, 479
Pectin
Saccharomycopsis fibuliger; Candida utilis; Symba process, 430
Pectinases
Aspergillus sp.; catabolic repression; reducing groups accumulation; activity by reducing groups; activity by viscosimetry, 690
Penicillium frequentans
Ketone reductions; *Curvularia lunata;* kinetic studies; biocatalysts; oxidoreductases, 521
Penicillium funiculosum
Hemicellulose degradation; starch damage; starch granule model; milling, 156
Penicillium pinophilum
Cellulase; β-glucosidase; mutant strains, 355
Cellulase; β-glucosidase; mutants, strair improvement, 169
Cellulase; xylanase; β-glucosidase; mutants; enzyme production, 176
Permeabilization
Kluyveromyces bulgaricus; β-galactosidase, 300
Phanerochaete chrysosporium
Ligninase; lipase; Tween 80; oleic acid; agitated cultures, 245
Phenylalanine
Precipitation; copper ions; phenylpyruvic acid; hydrogen sulphide, 542
L-Phenylalanine
Acetamidocinnamic acid; co-immobilization; κ-carrageenan; acetamidocinnamate amidohydrolase activity; aminotransferase activity; *Corynebacterium* sp; *Paracoccus denitrificans*, 479
L-Phenylalanine production
Yeast cells; optimization, 417
Phenylpyruvic acid
Phenylalanine; precipitation; copper ions; hydrogen sulphide, 542
Phosphatase
Immobilized biofilm; *Citrobacter* sp.; uranium accumulation; lead accumulation, 2
Phosphatidylcholine (lectin)
Transphosphatidylation; phospholipase D; phosphatidylglycerol; micelle system; emulsion, 350
Phospholipase D
Transphosphatidylation; phosphatidylcholine (lectin); phosphatidylglycerol; micelle system; emulsion, 350
Phosphotransacetylase
Acetate kinase; immobilization; controlled pore glass; controlled pore silica; storage stability, 285
Photoacoustic spectroscopy
Immobilization; chloroplast membranes; photobleaching; photoinhibition; electron transfer, 489
Photobleaching
Immobilization; chloroplast membranes; photoinhibition; photoacoustic spectroscopy; electron transfer, 489
Photoinhibition
Immobilization; chloroplast membranes; photobleaching; photoacoustic spectroscopy; electron transfer, 489
Pilot-scale purification
Isoelectric precipitation; monoclonal antibodies; gel chromafography, 361
Plasmid stability
Endo-β-1,4-glucanase gene; cloning; overproduction; secretion; *Bacillus subtilis; Bacillus megaterium*, 594
Polystyrene cation exchange resin
β-Amylase EC 3.2.1.2; immobilization; *Ipomea batata*, 550
Porous biocatalyst
Size-exclusion effects of substrate; immobilized trypsin; bead cellulose; hydrodynamic diameter of substrate; structure-activity relations, 44
Precipitation
Phenylalanine; copper ions; phenylpyruvic acid; hydrogen sulphide, 542
Pretreatment
Lignocellulosic substrates; enzymatic hydrolysis; adsorption model, 79
Process applications
Immobilized cells; bioreactor systems; fermentation products; biomedical products; wastewater treatment, 66
Process optimization
Xylose fermentation; *Pachysolen tannophilus*, 5
Product partition
Immobilized enzymes; bienzyme membrane; asymmetrical coupling; sequential enzymes; diffusion cell; compartmentalization, 652
Production inhibition
Immobilized cells; packed-bed bioreac-

tor; organic solvent; propene oxide production; kinetic modeling, 612
Production medium
Cellulase; glucose; immobilization; nitrogen; *Trichoderma reesei*, 739
Production technique
Animal cells; bioreactor; mammalian proteins; dense cultures, 514
Promoter function
Heat shock (hs) genes; expression systems, 130
Propene oxide production
Immobilized cells; packed-bed bioreactor; organic solvent; production inhibition; kinetic modeling, 612
Protein incorporation
N-labeled aminoacids; enzymatic synthesis; immobilized enzymes, 663
Protein secondary structure
Protein thermostability; genetic engineering; hydropathic profile; amino acid replacements, 238
Protein thermostability
Genetic engineering; protein secondary structure; hydropathic profile; amino acid replacements, 238
Protoplast fusion
Metarhizium anisopliae; biological control, 149
Pseudomonas
Catechol-2,3-oxygenase; halocatechol; fluorcatechol; benzonitrile; fluorobenzene, 706
Nickel; accumulation; adsorption; heavy-metals removal; resting cells, 709
Purification
Bacillus stearothermophilus; thermostable amylase, 749
Cellulase; *Trichoderma reesei;* turbidimetry; endoglucanase; cellobiohydrolase; specificity; zymogram, 25
β-Galactosidase fused protein A; *Escherichia coli;* extraction; aqueous two-phase systems, 730
Purine alkaloids
Coffea arabica; caffeine; bioreactors, 450

Ragi flour
Lactic acid; hydrolysed starchy substrates; wheat bran; soluble starch; *Lactobacillus plantarum;* crude enzymes of *Aspergillus ustus;* bacterial α-amylase; amyloglucosidase, 726
Raw starch
Thermostable β-amylase; *Clostridium thermosulfurogenes;* amylase, 598
Reducing groups accumulation
Aspergillus sp.; catabolic repression; activity by reducing groups; activity by viscosimetry; pectinases, 690
Regime analysis
Rules of thumb; scale-up; bioreactor design, 386
Resting cells
Nickel; accumulation; *Pseudomonas;* adsorption; heavy-metals removal, 709
Rice straw
Fungal enzymes; solid state fermentation; cellulase; β-D-glucosidase; D-xylanase; wheat bran; fibre; lignin; ash; crude protein, 97
Rifamycin B
Nocardia mediterranei; hollow fibre reactor, 345
Robillarda
Cellulase; endoglucanase; EC 3.2.1.4; β-glucosidase; EC 3.2.1.21; synergism, 459
Rules of thumb
Regime analysis; scale-up; bioreactor design, 386

Saccharification
Cellulose; cellulase; EC 3.2.1.4; *Aspergillus ustus; Trichoderma viride*, 484
Saccharomyces cerevisiae
Adsorption; carriers; *Zymomonas mobilis*, 272
Ethanol; growth inhibition; water activity, 334
Flow cytometry; cell recycle, 399
Klebsiella pneumoniae; gene expression; dinitrogenase reductase, 438
Saccharomycopsis fibuliger
Candida utilis; pectin; Symba process, 430
Candida utilis; food wastes; Symba process, 434
Scale-up
Catharanthus roseus; serpentine; air-lift bioreactors, 619
Regime analysis; rules of thumb; bioreactor design, 386
Secondary metabolite production
Catharanthus roseus; catharanthine; medium optimization, 466
Secretion
Endo-β-1,4-glucanase gene; cloning; overproduction; plasmid stability; *Bacillus subtilis; Bacillus megaterium*, 594
Sendai virus
Neuraminidase; HN protein, 553
Sequential enzymes
Immobilized enzymes; bienzyme membrane; asymmetrical coupling; product partition; diffusion cell; compartmentalization, 652
Serpentine
Catharanthus roseus; scale-up; air-lift bioreactors, 619
Serratia marcescens
Metabolite release; continuous reactor; nutrient limitation, 153
Side-chain degradation
Steroid transformation; cholesterol; androst-4-ene-3,17-dione; androsta-1,4-diene-3,17-dione; *Mycobacterium* sp.; magnetic immobilization; magnetic adsorption, 494
Silver resistance
Accumulation; *Thiobacillus ferrooxidans; Thiobacillus thiooxidans*, 331
Size-exclusion effects of substrate
Porous biocatalyst; immobilized trypsin; bead cellulose; hydrodynamic diameter of substrate; structure-activity relations, 44
Sludges
Stable foam; filamentous microbes, 164
Solid carriers
Clostridium; acetone-butanol fermentation; continuous culture; cell immobilization; 500
Solid state fermentation
Fungal enzymes; cellulase; β-D-glucosidase; D-xylanase; rice straw; wheat bran; fibre; lignin; ash; crude protein, 97
Soluble starch
Lactic acid; hydrolysed starchy substrates; ragi flour; wheat bran; *Lactobacillus plantarum;* crude enzymes of *Aspergillus ustus;* bacterial α-amylase; amyloglucosidase, 726
Solvent damage
Steroid transformation; *Aspergillus ochraceus*, 365
Solvent production
Whey permeate; bonechar; cell immobilization, 668
D-Sorbitol dehydrogenase
D-Xylose isomerase; *Streptomyces violaceoruber;* enzymatic method, 145
Specificity
Cellulase; *Trichoderma reesei;* turbidimetry; purification; endoglucanase; cellobiohydrolase; zymogram, 25
Sporotrichum thermophile
Thermophilic fungi; β-glucosidase production; thermostability, 744
Stable foam
Sludges; filamentous microbes, 164
Steady-state
Fermentation; ethanol; dynamic behavior; high cell density, 676
Starch damage
Penicillium funiculosum; hemicellulose degradation; starch granule model; milling, 156
Starch granule model
Penicillium funiculosum; hemicellulose degradation; starch damage; milling, 156
Steam explosion
Aspen; wheat straw; enzymic saccharification; enzyme recovery, 714
Stereoselective reaction
D(-)-Pantoyl lactone; *Nocardia asteroides; Candida parapsilosis*, 411
Steroid transformation
Aspergillus ochraceus; solvent damage, 365
Steroid transformation
Side-chain degradation; cholesterol; androst-4-ene-3,17-dione; androsta-1,4-diene-3,17-dione; *Mycobacterium* sp.; magnetic immobilization; magnetic adsorption, 494
Stimulants
Citric acid; brewery wastes; *Aspergillus niger;* trace metals, 291
Storage
Survival kinetics; freeze-drying; interfacial area, 531
Storage stability
Acetate kinase; phosphotransacetylase; immobilization; controlled pore glass; controlled pore silica, 285
Strain improvement
Penicillium pinophilum; cellulase; β-glucosidase; mutants, 169
Streptomyces
Lignin related-compounds; lignocellulose, 526
Streptomyces fradiae
Tylosin biosynthesis; ammonium regulation; tylonolide precursor-forming enzymes; macrocin-*O*-methyltransferase, 590
Streptomyces violaceoruber
D-Xylose isomerase; D-sorbitol dehydrogenase; enzymatic method, 145
Structure-activity relations
Size-exclusion effects of substrate; porous biocatalyst; immobilized trypsin; bead cellulose; hydrodynamic diameter of substrate, 44
Survival kinetics
Freeze-drying; storage; interfacial area, 531
Symba process
Saccharomycopsis fibuliger; Candida utilis; pectin food wastes, 430, 434
Synergism
Cellulase; endoglucanase; EC 3.2.1.4; β-glucosidase; EC 3.2.1.21; *Robillarda*, 459

Tagetes minuta
Immobilized systems; environmental conditions; κ-carrageenan, 303
Talaromyces emersonii
Mutants; endoglucanase; β-glucosidase, 422
Tannin
α-Amylase; *Calvatia gigantea*, 94
Technological potential
Biocatalyst screening; commercial applications, 194
Thermoascus aurantiacus
Hemicellulose hydrolysis; thermophilic fungi; xylanase; cellulase; thermostability, 16
Thermophilic fungi
Hemicellulose hydrolysis; *Thermoascus aurantiacus;* xylanase; cellulase; thermostability, 16
Thermophilic fungi
Sporotrichum thermophile; β-glucosidase production; thermostability, 744
Thermostability
Hemicellulose hydrolysis; thermophilic fungi; *Thermoascus aurantiacus;* xylanase; cellulase, 16
Thermostability
Thermophilic fungi, *Sporotrichum thermophile;* β-glucosidase production, 744
Thermostable amylase
Bacillus stearothermophilus; purification, 749
Thermostable β-amylase
Raw starch; *Clostridium thermosulfurogenes;* amylase, 598
Thiobacillus ferrooxidans
Silver resistance; accumulation; *Thiobacillus thiooxidans*, 331
Thiobacillus thiooxidans
Silver resistance; accumulation; *Thiobacillus ferrooxidans*, 331
Ti(IV) coating of silica beads
Alkylamine-glutaraldehyde derivatization; L-glutamate 1-carboxy-lyase; immobilization; adsorption of charged molecules, 225
Toxicity
Ethanol tolerance; osmotic pressure; intracellular accumulation; yeast, 322
Trace metals
Citric acid; brewery wastes; *Aspergillus niger;* stimulants, 291
Transformation of steroids
Viable immobilized cells; covalent immobilization of cells, 538
Transphosphosphatidylation
Phospholipase D; phosphatidylcholine (lectin); phosphatidylglycerol; micelle system; emulsion, 350
Triazine dyes
Enzyme purification; liquid-liquid extraction; affinity partitioning, 233
Trichoderma longibrachiatum
Laminarinase; *Agaricus bisporus*, 89
Trichoderma reesei
Cellulase; turbidimetry; purification; endoglucanase; cellobiohydrolase; specificity; zymogram, 25
Cellulase; glucose; immobilization; nitrogen; production medium, 739
Cellulase; *Aspergillus phoenicis*, 47
Trichoderma viride
Cellulose; cellulase; EC 3.2.1.4; saccharification; *Aspergillus ustus*, 484
Trypsin
Crosslinking agents; bisimidoester; glutaraldehyde; autolysis of trypsin, 161
Enzyme purification; ultrafiltration; affinity, 374
L-Tryptophan
D-L-Indolylmethylhydantoin; *N*-carbamoyl-L-tryptophan; hydantoinase; carbamoylase; *Flavobacterium*, 721
Turbidimetry
Cellulase; *Trichoderma reesei;* purification; endoglucanase; cellobiohydrolase; specificity; zymogram, 25
Tween 80
Ligninase; *Phanerochaete chrysosporium;* lipase; oleic acid; agitated cultures, 245
Tylonolide precursor-forming enzymes
Tylosin biosynthesis; *Streptomyces fradiae;* ammonium regulation; macrocin-*O*-methyltransfersase, 590
Tylosin biosynthesis
Streptomyces fradiae; ammonium regulation; tylonolide precursor-forming enzymes; macrocin-*O*-methyltransferase, 590

Ultrafiltation
Trypsin; enzyme purification; affinity, 374
Uranium accumulation
Immobilized biofilm; *Citrobacter* sp.; lead accumulation; phosphatase, 2

Viable immobilized cells
Transformation of steroids; covalent immobilization of cells, 538
Vinegar
Appropriate technology; microbial film reactor, 369

Wastewater treatment
Immobilized cells; bioreactor systems; process applications; fermentation products; biomedical products, 66
Water activity
Saccharomyces cerevisiae; ethanol; growth inhibition, 334
Wheat bran
Fungal enzymes; solid state fermentation; cellulase; β-D-glucosidase; D-xylanase; rice straw; fibre; lignin; ash; crude protein, 97
Wheat bran
Lactic acid; hydrolysed starchy substrates; ragi flour; soluble starch; *Lactobacillus plantarum;* crude enzymes of *Aspergillus ustus;* bacterial α-amylase; amyloglucosidase, 726
Wheat straw
Steam explosion; aspen; enzymic saccharification; enzyme recovery, 714
Whey permeate
Calorimetry; *Kluyveromyces fragilis;* energy balance; carbon balance; heat yield; batch-culture, 33
Clostridium acetobutylicum; continuous solvent production; in-line product removal, 672
Solvent production; bonechar; cell immobilization, 668
Whole cell immobilization
Ethanol fermentation; bioreactor; high ethanol productivity; continuous dynamic immobilized cell fermenter, 406
Whole cells
Immobilization; adsorption; entrapment; fermentation; bioreactor, 642

Xylanase
α-Glucuronidase; *Agaricus bisporus;* β-xylosidase, 83
Hemicellulose hydrolysis; thermophilic fungi; *Thermoascus aurantiacus;* cellulase; thermostability, 16
Penicillium pinophilum; cellulase; xylanase; mutants; enzyme production, 176
D-Xylanase
Fungal enzymes; solid state fermentation; cellulase; β-D-glucosidase; rice straw; wheat bran; fibre; lignin; ash; crude protein, 97
Xylose fermentation
Process optimization; *Pachysolen tannophilus*, 5
D-Xylose isomerase
D-Sorbitol dehydrogenase; *Streptomyces violaceoruber;* enzymatic method, 145
β-Xyiosidase
α-Glucuronidase; *Agaricus bisporus;* xylanase, 83

Yeast
Enzyme recovery, 281
Ethanol tolerance; toxicity; osmotic pressure; intracellular accumulation, 322
Yeast cells
L-Phenylalanine production; optimization, 417

Zymogram
Cellulase; *Trichoderma reesei;* turbidimetry; purification; endoglucanase; cellobiohydrolase; specificity, 25
Zymomonas mobilis
Adsorption; carriers; *Saccharomyces cerevisiae*, 272
